EDUCATION

Syracuse University, School of Information Studies, Syracuse, NY

August 2025

M.S. Applied Data Science

Relevant Coursework: Data Admin Concepts & Database Management, Quant Reasoning Data Science, Introduction to Data Science, Applied Machine Learning, Business Analytics, Information Visualization, Scripting for Data Analysis, Responsible AI, Data Analysis and Decision Making, Visual Analytic Dashboard, Data Warehouse.

University of Isfahan, College of Statistics, Isfahan, Iran

May 2006

B.E. Statistics

EXPERIENCE

Data Analyst, Suny Upstate Medical University, Syracuse, NY

January 2023 - May 2025

- Evaluated clinical research databases in collaboration with a six-member team.
- Applied Microsoft Excel and SPSS to clean, validate, and interpret large datasets.
- Generated findings for 5+ clinical studies, resulting in 2 peer-reviewed publications.

PROJECTS

MarFlix Intelligence

June 2025 - August 2025

- Engineered a Snowflake data warehouse integrating 15+ retail tables from Fudgemart & Fudgeflix to unify sales and fulfillment analysis.
- Implemented ETL pipelines with dbt & SQL, processing 15+ retail tables; designed star schemas supporting sales and fulfillment reporting across multiple departments.
- Produced dbt YAML documentation and developed 2 interactive Power BI dashboards, improving data accessibility for 30+ business users.

U.S Storm Analysis Dashboard

March 2025 - May 2025

- Built interactive dashboards in Power BI to monitor storm impacts across 50+ U.S. regions.
- Collaborated with five teammates to design KPIs, filters, and maps.
- Communicated actionable disaster insights to 30+ peers, demonstrating value of visual analytics in emergency planning.

Detecting Fraud in Hawaii Airbnb Listings

October 2024 - December 2024

- Engineered anomaly detection models (DBSCAN, K-Means) in Python to identify fraudulent Airbnb listings across 10,000+ records, improving fraud detection accuracy.
- Provided fraud detection insights to 40 peers through engaging visual storytelling.

Analyzing NYC Citi Bike Trips

October 2024 - December 2024

- Integrated Citi Bike and weather datasets containing 2M+ trip records; analyzed ridership by time, borough, and gender to uncover equity gaps.
- Visualized results with Folium maps and Matplotlib, highlighting usage trends.
- Shared findings at Poster Day, Syracuse University, engaging 40+ peers and faculty with equity-focused insights.

Pancreas After Kidney Transplantation - World Journal of Surgery

August 2023 - May 2024

- Applied statistical models (Excel, SPSS, Stata) to analyze transplant outcomes.
- Led cross-team virtual discussions with 6 researchers to align findings for publication.
- Co-authored peer-reviewed research published in the World Journal of Surgery (2024), contributing statistical analysis on 1,000+ transplant cases and co-drafting manuscript.

Understanding Key Drivers of Residential Energy Consumption in Peak month

March 2024 - May 2024

- Performed regression analysis in Excel and R to identify drivers of energy use.
- Delivered insights to 30 peers using R visualizations and facilitated group discussions.

Event Planning System Development

March 2024 - May 2024

- Designed and built an event management database with 10+ normalized tables and ER diagrams, improving system performance and data accuracy.
- Created a user-friendly PowerApps interface; presented functionality to 30 students.

Liver Transplantation from Extended Criteria Donors, A Considerable Source for Donor Pool Expansion March 2023 - November 2023

- Assessed transplant outcomes using Excel & SPSS for extended criteria donors.
- Generated donor survival insights and presented findings at national conferences.
- Drafted and co-authored two manuscript sections for submission to peer-reviewed transplant journals.

TECHNICAL SKILLS

Programming & Analysis: Python, R, SQL.

Data Engineering: Snowflake, dbt, Azure Data Studio.

Statistical Tools: SPSS, Stata.

Visualization: Tableau, Power BI.

Software: MS Excel, PowerPoint, Word.
